hear from you by return mail favorably in regard to this matter, I am, sir, yours fraternally, Thos. P. MITCHELL.

Chairman Executive Committee.

To the above he replied as follows:

COLUMBIA, S. C., May 15, 1894.

The Hon. Thomas P. Mitchell, Wood-We demand that our national legisla-tion shall be so framed in the future as not to build up one industry at the expense of another.

We believe that the money of the coun ward, S. C.—My Dear Sir; Your letter of yesterday received. As you ask for a prompt reply, I answer at once, Having been the recognized leader of the Reform party or faction in the State since its organization in April, 1886, and having been very pronounced and outspoken in my speech at St. Louis last October, and try should be kept as much as possible in the hands of the people, and hence we demand all national and State revenues shall be limited to the unnecessary expenses of the Government economically and honestly administered. my speech at St. Louis last October, and more recently in my interview of April 9th, ult. I did not go into details in answering your letter of April 18, because I thought it entirely unnecessary. I had no thought of keeping any opinions or policy I hold on public questions hidden—as I am not a straddler or dodger in polities or anything else,

I will, therefore, answer as olearly as I know how, in order to satify all who We demand that postal savings banks be established by the Government for the

gafe deposits of the earnings of the people, and to facilitate exchange. Second. The land, including all the natural sources of wealth, is the heritage of the people and should not be monopolized for speculative purposes, and alien ownership of land should be prohibited.

All land now held by reilroads and other corporations, in excess of their actual needs, and all lands now owned by aliens should be reclaimed by the Government and held for actual settlers only.

Third: Transportation being a means of exchange and a public necessity, the Government should own and operate the ums, gold, silver and legal tender green-backs, to at least fifty dollars per capita of The telegraph and telephone, like the post office system, being a necessity for the transmission of news, should be owned and operated by the Government in the interest of the people.

Taking up the questions of your letter To the three propositions set forth above I can and do give my earnest support and will strive, if elected Senator, to see them incorporated into law and be-

in their order. I beg to say in response to the first, I will discuss any public ques-tion the people may desire to have dis-cussed, and as the "finances of the counsee them incorporated into law and become the fixed policy of our Government.

I can advocate and fight for all the other "demands" except that I doubt the wisdom or practicability of the Government owning and running all railroads, telegraph and telephone lines, I will take occasion during the campaign to discuss all these matters fully. The one essential point on which I differ with the Alliance is the lending of money to the people. I could easily dodge behind the "or something better," if so minded, but my self-respect and my duty to the people who have shown such love and trust in my leadership will not allow me to remain to ask me proposed by the Alliance. I assume you mean the latter.

Replying to your second question, I

Replying to your second question, I beg to say that in my political life I have never allowed any caucus, or society or organization, to bind my conscience, and shall not do so in the future, Caucuses, or societies, or organizations of any kind, which seek to bind the political consciand tell them the truth. This is the more obligatory on me now because I am seeking to enfer national politics. In 1892 I did not discuss national questions or oppose the incorporation of the Ocala platform in the State Democratic platform in May because I saw there was danger of our hot-headed Alliance men splitting off into a Third Party—The fatal blunder which caused Mr. Cleyeland's nomination and well night destroyed the Alliance in the suggestion that any man's conscience or political action should be bound by them. I never will so far surrender my which caused Mr. Cleyeland's nomination and well nigh destroyed the Alliance in all the other Southern States. Had our example in South Carolina been followed in the other Southern States Alliance ideas would be the predominant ones in all the South to-day and our National Administration would not be controlled by allied Mugwumps and Republicans and traitors. I am differently situated now, being a candidate for the United States Senate, and honesty compels that everyone who votes for meshall know how I stand. I am unalterably opposed to the National Government lending anybody money. The Alliance

be so bound. No oaths are administered no pledges exacted as a requisite of party fealty. If there were I would never attend a cancus.

In regard to demand "first" of the Al-liance, I will say that the sub-treasury plan has been abandoned because it was found to be impracticable and unconstitutional, and therefore it is unnecessary to discuss it. In my judgment a "better system" would be attained by the repeat of the 10 per cent tax on State banks o circulation, and I trust that the Alliance will take that up and make it one of its 'demands." I cannot, of course, discuss this proposition at length in this connection, but take the liberty of handing you one of my speeches delivered in the Senate at the last extra session, in which I have attempted to elaborate the argument in favor of the repeal, and beg you to do me the favor to examine it. I think you will find that if this taxishould be repea ed we would have "a safe, sound, flexi-ble currency," and enough of it. I favor "the free and unlimited coinage of silver and gold at the present legal ratio of 16 to 1," and advocated it in Con-

gress before the Alliance was organized and am gratified to know that the Alliance has adopted my platform on this subject.

Fifty dollars per capita is not too much currency for a country like ours, but the trouble with our present financial system is not so much the per capita amount of currency as the inequality of its distribution. Some sections of the country have much more than \$50 per capita, while in our section I doubt if we have \$2 per capita. If in our State we could be guaranteed \$20 per capita, if so much was necessary for the transaction of our business, I would compromise on that; we should then have about \$20,000,000 of currency in circulation in South Caroline wherever I doubt in wherever I doubt it we now have lina, whereas I doubt if we now have \$2,000,000. If, by the repeal of the 10 per cent tax, the States should be permitted to authorize banks of circulation, we should have just so much currency as our local wants require and no more—

but we should have enough. I favor an income tax and shall have an opportunity of voting for it in the pending tariff bill. I concur in the demand that the money of the country should be kept as much as possible in the hands of the people, and that all National and State revenues shall be limited to the necessary expenses of the Government, economically administered. This is good, sound doctrine, and I heartily subscribe to it.

I can see no objection to "postal savings banks," although a measure of that kind would be largely tentative in this country and should be adopted with caution The second general demand, as to the

and circumspection. public lands, is sound and in accordance with true Democratic principles. The third general demand "that the Government should own and operate the Government should own and operate the railroads in the interest of the people," and that "the telephone and telegraph should be owned and operated in the interest of the people" would, in my judgment, be impolitic and unwise. I have always understood that the Alliance was opposed to the further increase of the "bonded debt" of the Government, and I agree with the Alliance in that proposition. The Government could not nav and nobody knows how many millions to buy the telegraph and telephone systems of the country. Is the Alliance prepared to urge the creation of such a bondgenerations, and thereby perpetuate the national banking system indefinitely? If so, I can not go with it. The Government now has control and supervision of the railroads by and through the Inter-State commerce commission, and the overland the commerce commission and the overland the commerce commission and the commerce commission. Since commerce commission, and the experiment has not realized the expectations of its friends. The ownership of the railroads in despotic governments is people, for freight rates are 50 per cent. higher in those countries than in this, and they are consequently a great burden upon the masses of the people. I believe I have now made full and complete an-

swers to your inquiries, in general and in detail. If anything has been omitted I will gladly supplement what I have said if you will call it to my attention. Very truly yours,

M. C. BUTLER.

Had Her Ears Trimmed.

New York, May 20.-A young society woman of Philadelphia underwent a painful operation yesterday at the hands of Dr. L. F. All the standard-bearers were dressed as knights of old, carrying their banners with a dignity rarely ever seen in young people. The children arranged themselves around the throne and the audience listened breath-

lessly to the speech of Floy Norris, who crowned her sister, Miss Jessie, "Queen of May," and a more impressive sight is hard to imagine than the one which was presented as the young lady bent her head to receive a crown of flowers placed there by the hands of her dainty little sis ter, who led the Queen to the throne be-tween John McClain and Mary Hubbard as maid of honor, dressed in white trim-med with roses. The scene became more realistic when her regal beauty and grace shone forth to apprise us of the fact that one had been chosen fair enough to grace the throne erected by her charming little The first subject who approached the

I have always understood that the Alliance was opposed to the further increase of the "bonded debt" of the Government, and I agree with the Alliance in that proposition. The Government could not pay cash for the one hundred and ninety odd thousand miles of railroads and the vast mileage of telegraph and telephones. The rate of taxation necessary to raisethe cash would destroy the people, and the only alternative to put the Government in ownership of the railroads, telegraphs and telephones would be to issue eight billions of bonds to buy the railroads, and nobody knows how many millions
